About IntelTech

An Abu Dhabi company built to take complexity off our clients' hands.

MESSAGE FROM THE MANAGING DIRECTOR

> **“Our clients do not want six vendors. They want one partner who understands the field, the systems and the people, and who stands behind the result.”**

When we founded IntelTech in 2017, we set out to solve a problem we saw on every project: operators and industrial companies were managing separate suppliers for tools, crews, software, training and compliance, and paying for the gaps between them.

Today IntelTech brings these capabilities together under one contract. Our engineers support well completion and field operations; our own Lucerra software and Lumen AI give clients visibility of every job, hire and approval; and our training, manpower and consultancy teams build the local capability that keeps operations running.

We hold ourselves to certified standards, ISO 9001, 14001 and 45001, and we run our own business on the systems we sell. As we grow across the Middle East and North Africa, with our renewable energy company in Abu Dhabi and our sister company in Oman, our commitment stays the same: safe work, honest advice and results we are proud to sign.

Dr. Atheer Alkhazrajy
Managing Director, IntelTech Solutions and Consultancy L.L.C.

AT A GLANCE

IntelTech in numbers.

LEGAL NAME	IntelTech Solutions and Consultancy L.L.C.
FOUNDED	2017, United Arab Emirates

OUR VISION

To be the partner the region trusts to run its most demanding operations, where energy expertise, intelligent software and skilled people work as one.

OUR MISSION

To deliver oil & gas services, intelligent software, training and manpower as one accountable team, helping our clients cut complexity, meet every standard and build lasting local capability.

Innovation

We build our own tools and keep improving how work gets done.

Integrity

We say what we will do, do it, and stand behind the result.

Collaboration

We work as part of our clients' teams, not at arm's length.

Excellence

Certified systems and careful people on every job.

Sustainability

Safe sites, responsible supply and lasting local capability.

OUR JOURNEY AND GROUP

How IntelTech grew.

2017

Founded

Established in the UAE as an engineering and strategic consultancy.

2019

Regional growth

Operations extended into Saudi Arabia and Jordan.

2024

Multi-disciplinary

Oil & gas, software, training and manpower under one roof.

2025

Certified and specialised

ISO 9001, 14001 and 45001. Exclusive regional agencies for downhole tools and rig automation. IntelTech Renewable Energy founded.

2026

Lucerra and new markets

Lucerra ERP, Lucerra Talents and Lumen AI launched. Ten markets, including Libya, Syria and Qatar.

IntelTech Solutions and Consultancy L.L.C.
Parent company · Abu Dhabi, UAE

IntelTech Renewable Energy L.L.C.
Wholly owned subsidiary · Abu Dhabi · renewable energy solutions

Marketing & Communications

ORGANISATION

Twelve departments, one leadership.

Managing Director
Dr. Atheer Alkhazrajy

Sales & Business Development
Sales engineers, prequalification, contracts

Operations
Field service engineers and technicians

Operational Workshop
Workshop supervisors, maintenance engineers

Procurement & Logistics
Buyers, procurement engineers, logistics

Finance & Accounting
Accounting, tax, credit control, audit

Legal & Compliance
Legal advisor, compliance officers

QHSE
Quality, QA/QC, HSE engineers and auditors

IT Solutions
Consultants, engineers, software developers

Human Resources
Recruitment, training, payroll, wellbeing

Marketing
Media, digital and marketing specialists

Consultancy Operations
QHSE, sustainability, business, engineering

Associates & Regions
Teams and partners across our markets

02

Capabilities

Six capabilities that work as one: from the well site to the boardroom.

HOW IT FITS TOGETHER

Across the life of an asset.

FIELD

Oil & Gas Services

Well completion, downhole tools, rig automation, NDT and corrosion monitoring.

BUILD & SUPPLY

EPC & Procurement

Plants, pressure vessels, renewables and industrial supply.

PEOPLE

Manpower & Recruitment

Direct and indirect hiring, executive search, Emiratisation.

ADVISE & RUN

Consultancy & Managed Services

Strategy, HR, QHSE and sustainability; managed HR, IT and QHSE.

SUPPORTED ACROSS EVERY CAPABILITY BY **Lucerra & AI Solutions** ERP, recruitment software, Lumen AI, web and custom software

Training & Workshops Soft skills, leadership, technical, HSE and quality

SECTORS WE SERVE

- Oil & gas operators
- Drilling contractors
- Chemicals & fertilisers
- Industrial & manufacturing
- Government & semi-government
- Recruitment agencies
- SMEs & family groups

CAPABILITY 01

Oil & Gas Services

Upstream and downstream support from Abu Dhabi: well completion, inspection and field crews, backed by our own range of downhole tools and rig automation solutions.

Our services

- Well completion and workover support
- Inspection and NDT
- Corrosion monitoring programmes
- Field support and supply
- Spare parts and rig maintenance

Our products · Downhole tools

- Production and thermal packers
- Liner hangers, bridge plugs and retainers
- Sand control, flow control and frac plugs
- Thru-tubing tools and velocity strings

Our products · Rig automation

- AI robotic drilling rigs, onshore and offshore
- Iron roughneck, power slips and fingerboard
- Intelligent driller's cockpit
- Remote rig monitoring

RESOURCES & CAPACITY

- ✓ Field service engineers and technicians
- ✓ Regional stock of common completion tools
- ✓ Operational workshop with maintenance engineers
- ✓ API Spec Q2 controls in our operations system

OUR SERVICES · SPARE PARTS & RIG MAINTENANCE

Keeping drilling packages running.

Service at the rig site, overhauls in our partner workshops and spare parts from stock, for onshore and offshore rigs.

01 **Rig-site service**

Engineers mobilised for troubleshooting, repairs, overhauls and upgrades of drawworks, top drives, iron roughnecks, pipe rackers and riser tensioners.

02 **In-house overhaul**

Top drive, iron roughneck and full drilling package overhauls, load-tested and returned with inspection records.

03 **Spare parts supply**

Original and made-to-drawing parts from stock, exchange units and fast response for critical items.

SCOPE OF SUPPLY

Top drive | Iron roughneck | Drawworks | Mud pump | Pipe racker | Fingerboard | Crane | BOP | HPU | Solids control

Drawworks overhaul

Rig-site repairs

Top drive service

Slips & handling tools

Machined spare parts

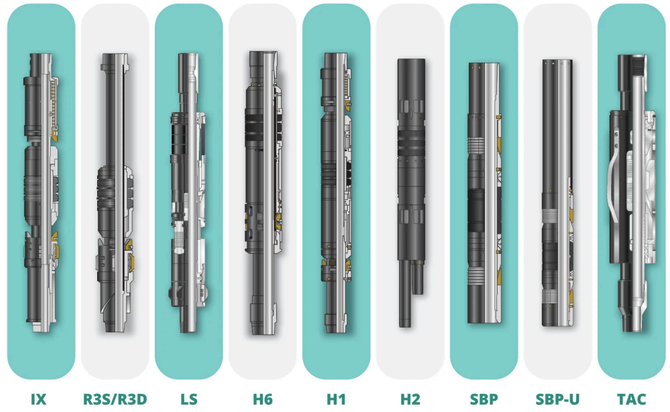

Iron roughneck assemblies

OUR PRODUCTS · DOWNHOLE TOOLS 1 OF 2

Downhole completion tools.

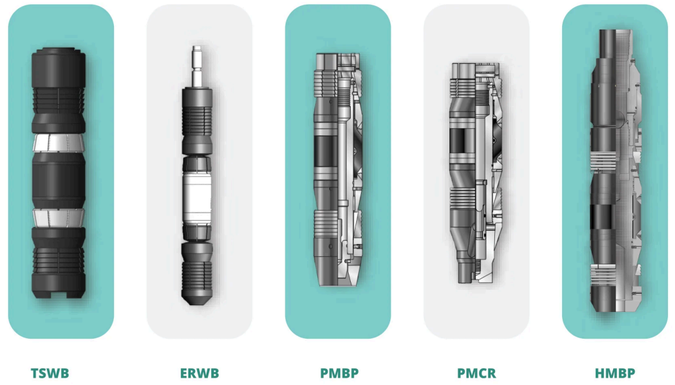

Supplied from regional stock across our markets, with field engineers for running support. Sizes, ratings and data sheets on request.

Production packers

Hydraulic and mechanical-set packers that isolate the annulus and anchor the completion string, including seal bore packers and accessories.

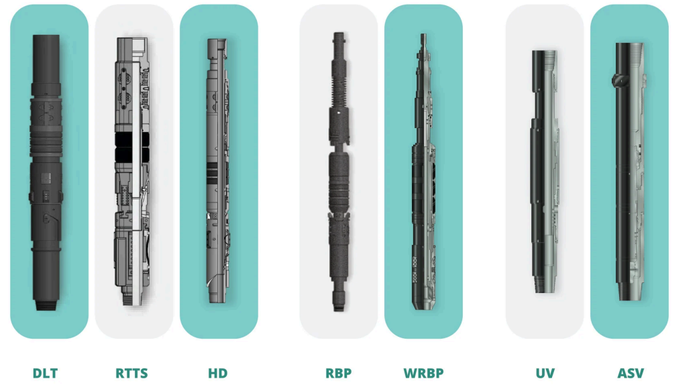

- Hydraulic-set
- Mechanical-set
- Seal bore
- Accessories

Bridge plugs & cement retainers

Plugs and retainers for zonal isolation, squeeze cementing and well abandonment, with matching running tools.

- Top-set bridge plug
- Convertible bridge plug
- Cement retainer
- Running tools

Packer service tools

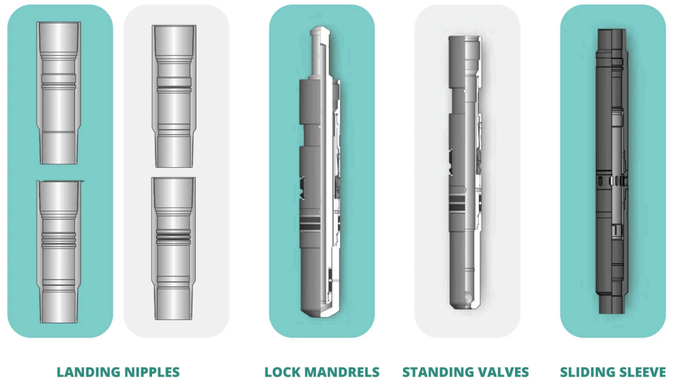

Retrievable tools for testing, treating and isolating zones during well servicing and workover.

- Retrievable service packers
- Retrievable bridge plugs
- Storm and unloader valves
- Safety joint

OUR PRODUCTS · DOWNHOLE TOOLS 2 OF 2

Intervention, flow and sand control.

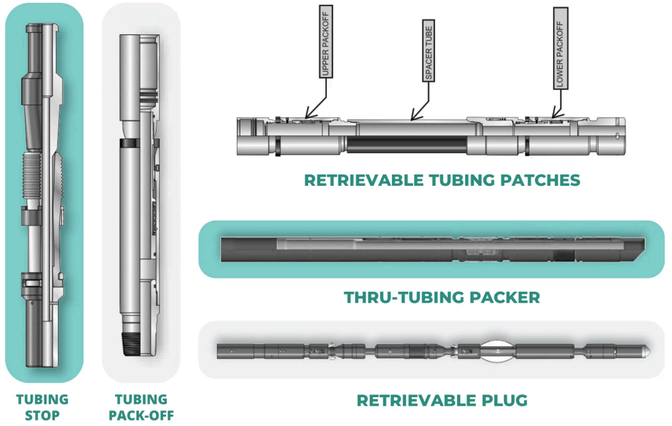

Each tool is selected with the client's well data and supported on site by our engineers, from run planning to after-run report.

Flow control systems

Slickline-run equipment to control, shut off and redirect flow in the production tubing.

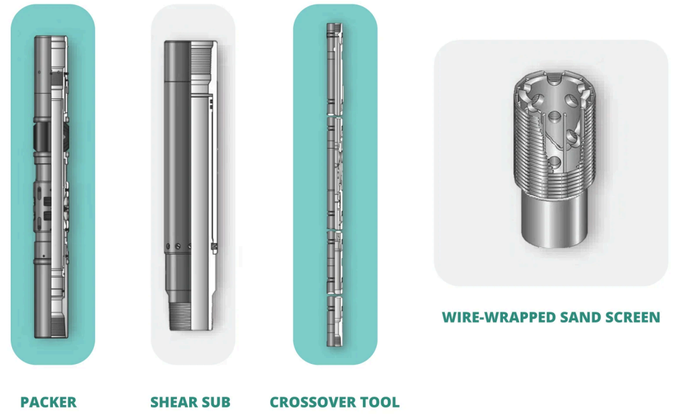

- Landing nipples
- Lock mandrels
- Standing valves
- Sliding sleeves

Thru-tubing intervention

Tools set through existing tubing to repair, isolate or plug a well without pulling the completion.

- Tubing stop & pack-off
- Tubing patches
- Thru-tubing packer
- Retrievable plug

Sand control systems

Gravel-pack and screen systems that keep formation sand out of the well and protect production equipment.

- Gravel-pack packer
- Shear sub
- Crossover tool
- Wire-wrapped screen

OUR PRODUCTS · RIG AUTOMATION

Robotic rig systems and AI drilling.

95%+
less red-zone exposure

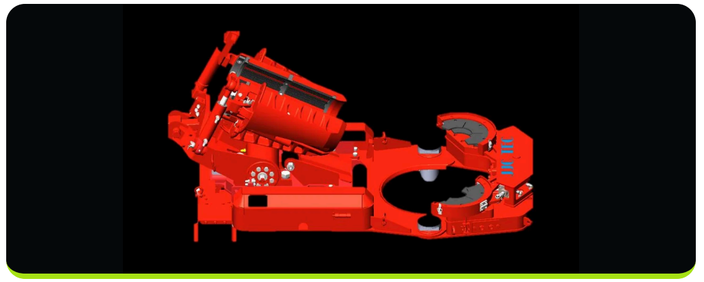

25–30
stands per hour

Up to 2×
faster tripping

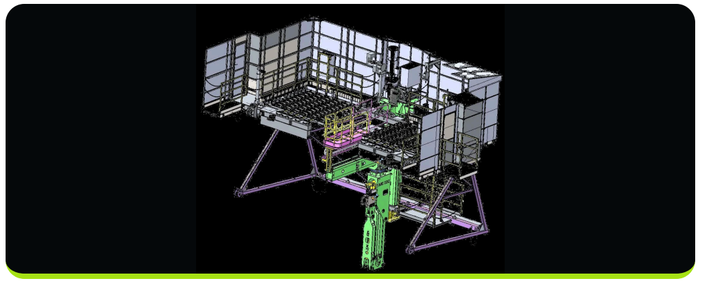

Intelligent iron roughneck

Makes up and breaks out connections automatically, with torque control and no hands on the pipe.

Power slips

Remote-operated slips that grip and release the string at the rotary table, in step with the pipe handler.

Automatic fingerboard

Racks and stores stands without a derrickman, so the monkey board can run unmanned.

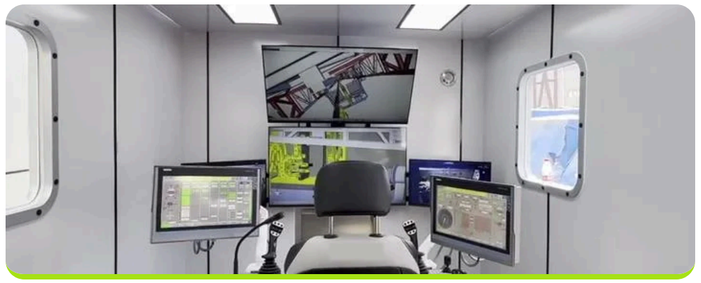

Electric pipe racker

Servo-driven pipe handling with no hydraulics, for faster and smoother tripping.

Robotic drill floor

Robots run tripping and connections while the crew stays outside the red zone.

Intelligent driller's cockpit

One seat to drive the rig, with live video, AI zone alarms and remote monitoring.

CAPABILITY 02

Lucerra & AI Solutions

Software we build ourselves, for the way industry works, and run our own business on.

Lucerra ERP

34 modules in eight workspaces: finance, VAT and corporate tax, UAE payroll and WPS, procurement and inventory, projects and oilfield services, QHSE and API Spec Q2. Full Arabic, web and phone.

Lucerra Talents

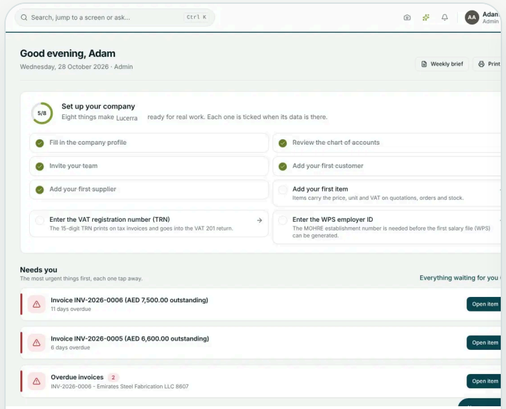

Recruitment platform for agencies: job intake, sourcing, Lumen screening, client portal, visa and mobilisation, contractor billing.

Lumen AI

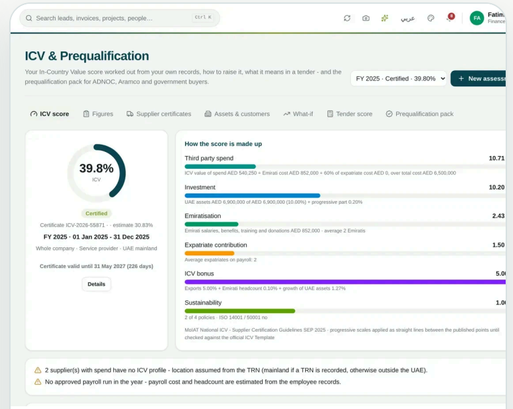

Insight that acts. Plans tasks, reads documents and asks before any change, always within each user's permissions.

ALSO DELIVERED

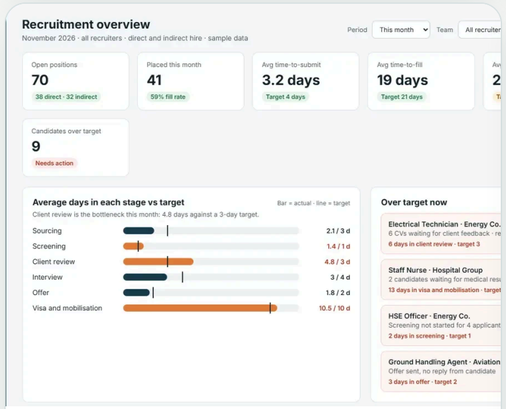

- ✓ Web design and development
- ✓ Official Odoo partner
- ✓ Custom software and mobile apps
- ✓ ISO/IEC 27001 compliant information security

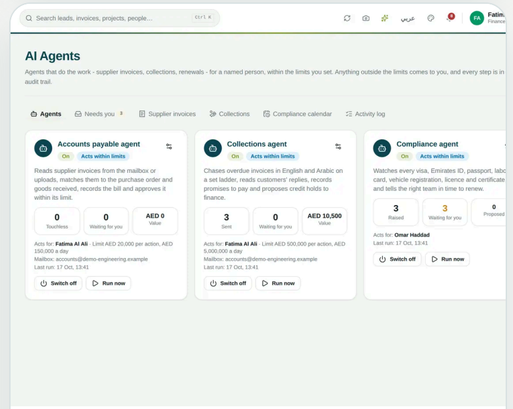

Lucerra ERP · Home and approvals

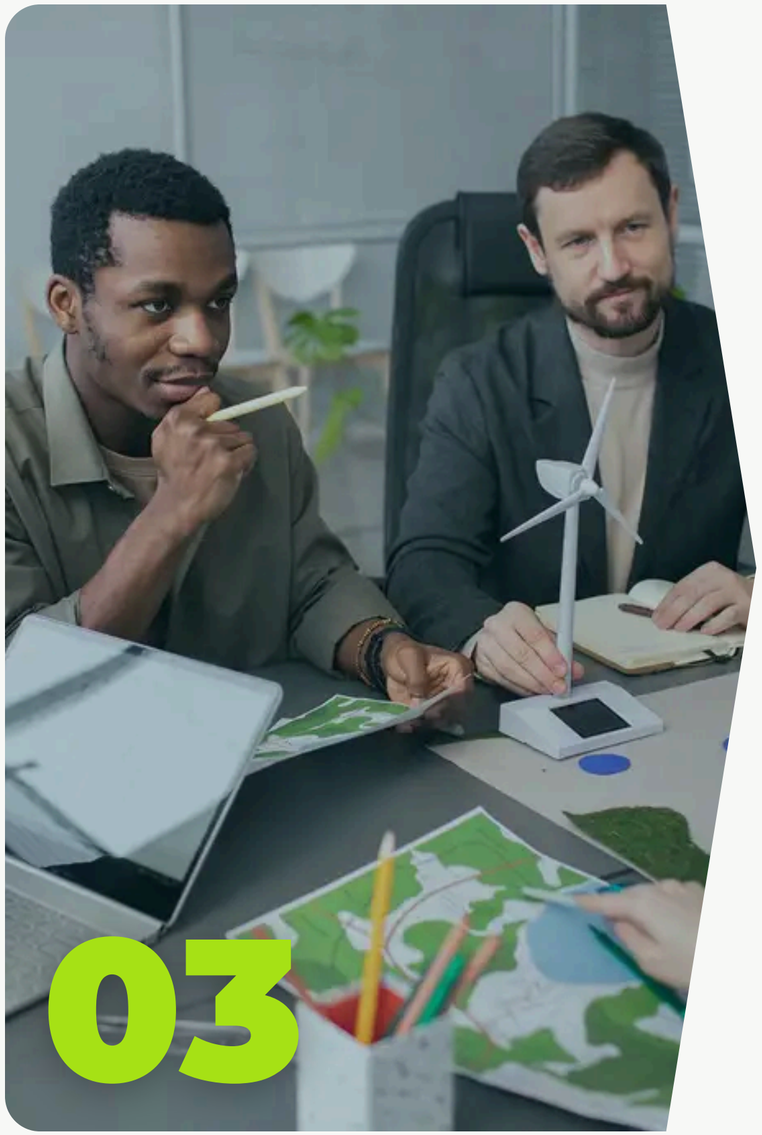

Lucerra ERP · ICV and prequalification

Lucerra Talents · Recruitment overview

Lumen AI · Agents within set limits

CAPABILITY 03

Training & Workshops

Corporate training built around your team, not a catalogue. Delivered on site, at our Abu Dhabi venue or online, in English or Arabic.

Professional skills

- Soft skills: communication, teamwork, customer service
- Leadership and management
- Engagement and brainstorming workshops
- Strategy days and problem solving

Technical & safety

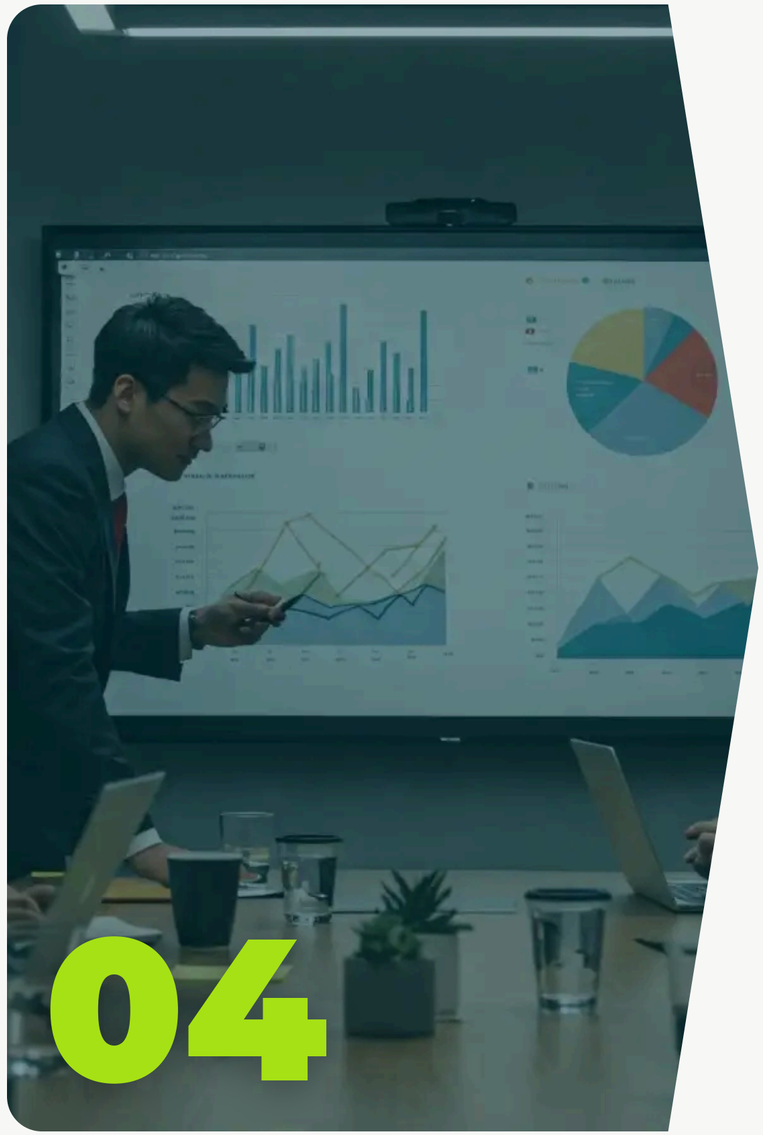

- Oil & gas technical training
- HSE: permit to work, incident investigation
- Mining and site safety
- Quality: ISO 9001, internal audit, Six Sigma

How we deliver

- Needs analysis and programme design
- Before-and-after assessment
- Half-day to multi-day formats
- Coaching and follow-up

RESOURCES & CAPACITY

- ✓ Training and development specialists in our HR department
- ✓ On site, Abu Dhabi venue or online, English and Arabic
- ✓ Trainers with field and management experience

CAPABILITY 04

Manpower & Recruitment

Manpower solutions through direct and indirect hiring: from one specialist to a full crew, for permanent roles, contracts and national hiring targets.

Hiring models

- Direct hiring onto the client's payroll
- Indirect hiring on IntelTech's payroll
- Contract and outsourced staffing
- Project crews

Specialist services

- Executive search and headhunting
- Overseas recruitment and mobilisation
- Recruitment process outsourcing (RPO)
- Visa, WPS and on-site support

National hiring

- Emiratisation, including Nafis registration
- Omanisation through IEBS
- Payroll and compliance reporting

RESOURCES & CAPACITY

- ✓ HR department with recruitment, payroll and wellbeing specialists
- ✓ Lucerra Talents client portal for every vacancy
- ✓ Associates and partners across our markets
- ✓ UAE labour law, WPS and Nafis compliance

CAPABILITY 05

EPC & Procurement

Engineering, procurement and commissioning for chemical and fertiliser plants and pressure vessels, plus sourcing and supply of chemicals, oils, equipment and project materials.

Engineering & delivery

- Feasibility and engineering design
- Chemical and fertiliser production lines
- LPG spherical tanks and pressure vessels
- Installation and commissioning

Renewable energy

- Delivered by IntelTech Renewable Energy, Abu Dhabi
- Solar power
- Energy efficiency audits
- Energy storage

Industrial procurement

- Industrial chemicals and hydraulic oils
- OCTG and drilling pipes
- Valves, pumps, compressors, detectors
- Marine fenders and mooring bollards

RESOURCES & CAPACITY

- ✓ Procurement and logistics department with buyers and engineers
- ✓ Engineering review of every supply decision
- ✓ Global sourcing, local delivery with full documentation
- ✓ ISO 14001 certified environmental management

CAPABILITY 06

Consultancy & Managed Services

Business, HR, HSE and quality, and sustainability consultancy, plus managed HR, IT and QHSE services run for you by our specialists.

Consultancy

- Strategy, market research, process improvement
- Project management (PMO)
- HR strategy, structure and policies
- Environmental studies and ESG roadmaps

HSE & quality

- ISO 9001, 14001 and 45001 implementation
- HSE audits and risk assessment
- Certification readiness
- Internal auditing

Managed services

- Managed HR and payroll
- Managed IT support and networks
- Managed QHSE and document control
- Monthly reporting

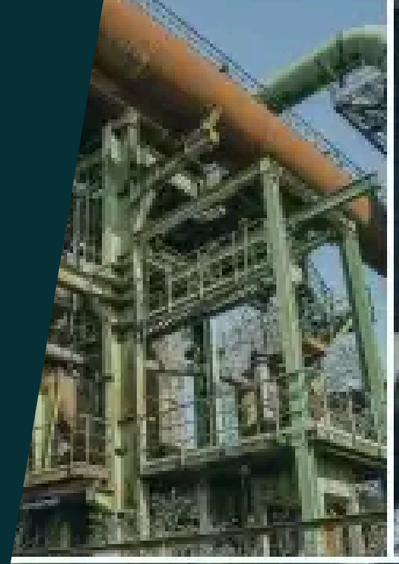

RESOURCES & CAPACITY

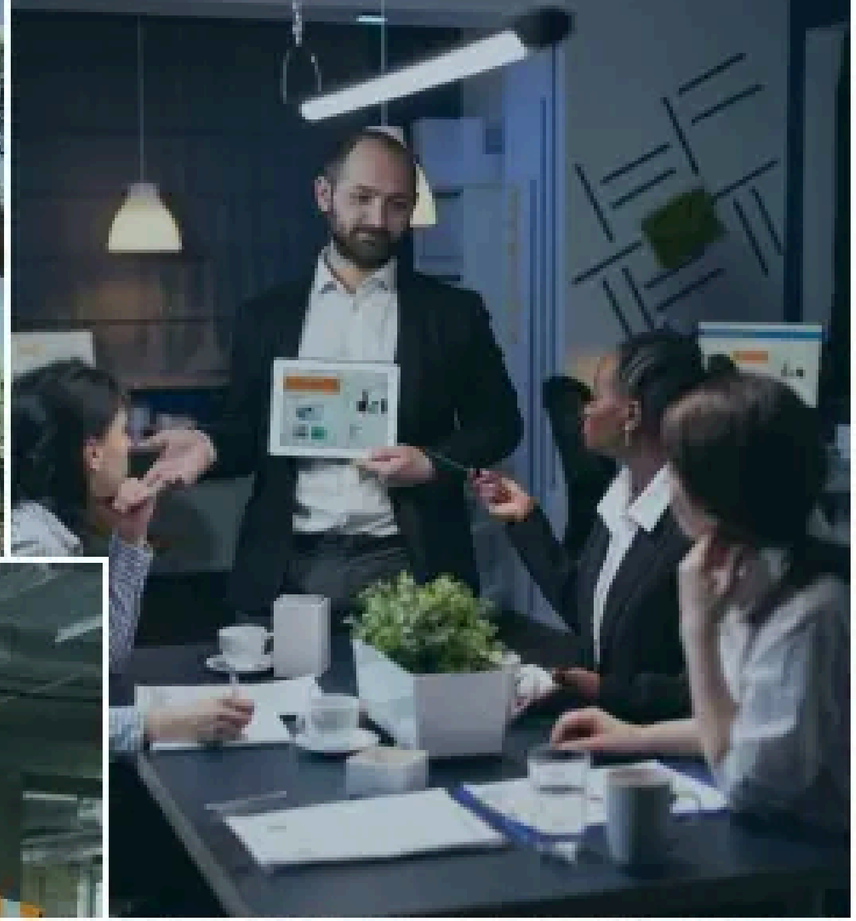

- ✓ Consultancy operations team: QHSE, sustainability, business and engineering consultants
- ✓ Fixed-fee projects or monthly managed services
- ✓ Practitioners who run IntelTech's own certified systems

03

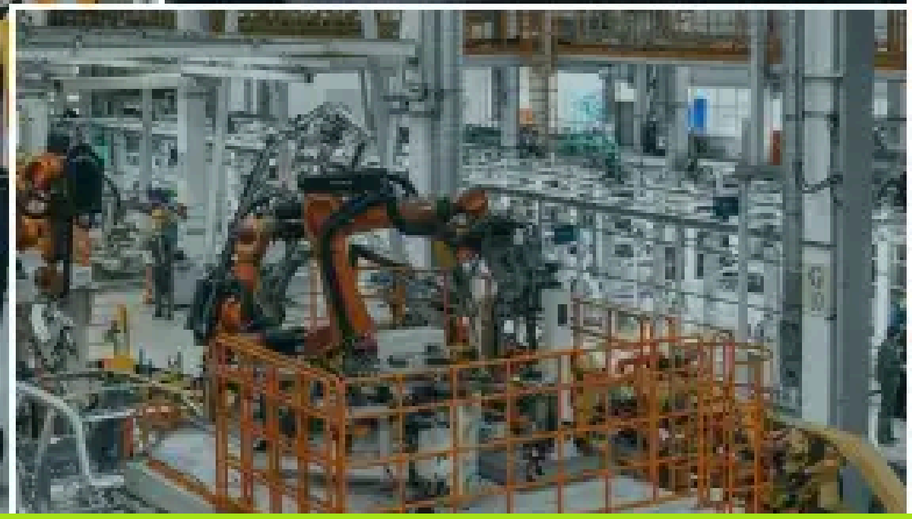

Experience

Selected work for industrial, energy and service clients across the region.

PROJECT REGISTER

Selected experience.

Client names are withheld in this edition; references are available on request.

01

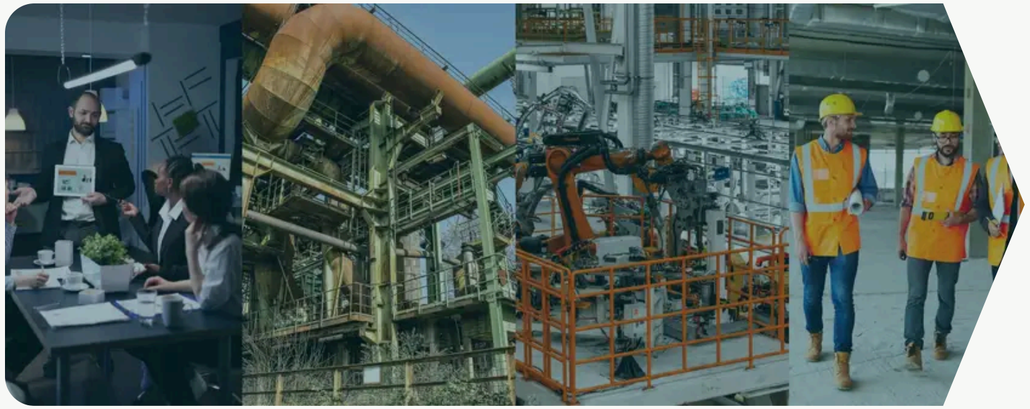

Agrochemical production line

CLIENT
Agrochemical manufacturer

SECTOR
Chemicals & agriculture

CAPABILITY
EPC & Procurement

DELIVERY
Design to commissioning

OBJECTIVE

Establish a new production line for agronomic products, from initial planning through to a running plant.

SCOPE OF WORK

- Planning and process design
- Engineering design
- Equipment procurement
- Installation and commissioning

OUTCOME

The production line was designed, supplied, installed and commissioned by one IntelTech team, with the client's specific needs reflected in the solution.

> **“From the initial planning and design phase to the final installation and commissioning, the team demonstrated a high level of professionalism, expertise and dedication.” — CEO, client company**

02

Fertiliser production facility

CLIENT
Fertiliser manufacturer

LOCATION
Sharjah, UAE

CAPABILITY
EPC & Procurement · Software

DELIVERY
Total solution

OBJECTIVE

Set up a new fertiliser production facility in Sharjah, with the systems to run it.

SCOPE OF WORK

- Engineering design
- Equipment procurement
- Installation
- Software to support plant operations

OUTCOME

A complete facility delivered as a total solution: engineering, equipment, installation and software from one partner.

> **“They were able to provide us with a total solution, including engineering design, equipment procurement, installation, and software empowerment.” — Owner, client company**

03

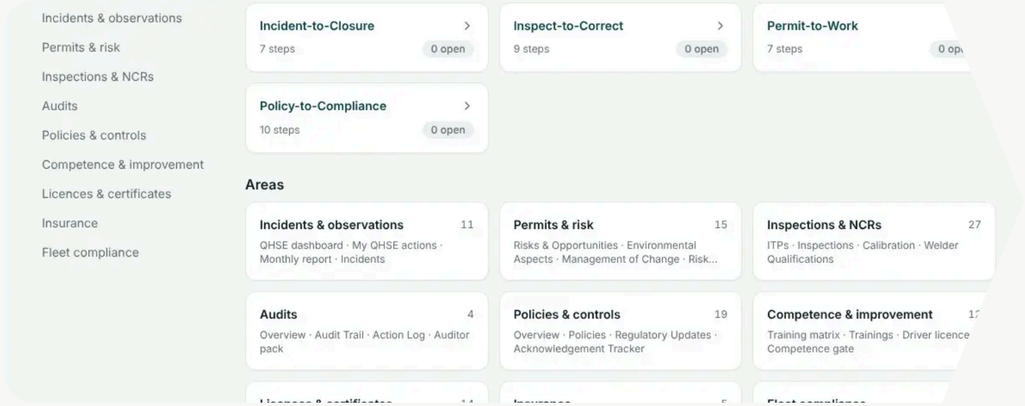

HR and compliance automation

CLIENT
Inspection and field services company

LOCATION
Egypt

CAPABILITY
Lucerra & AI Solutions

RESULT
45% less audit preparation time

OBJECTIVE

End the four weeks of manual work needed for every ISO and internal HR audit, caused by scattered records and site attendance data.

SCOPE OF WORK

- Lucerra ERP HR module
- Employee lifecycle, payroll and compliance data in one system
- Field and site attendance capture
- Audit-ready reports

OUTCOME

Audit preparation time fell by 45%, freeing more than 300 hours of HR time over six months for strategic work.

04

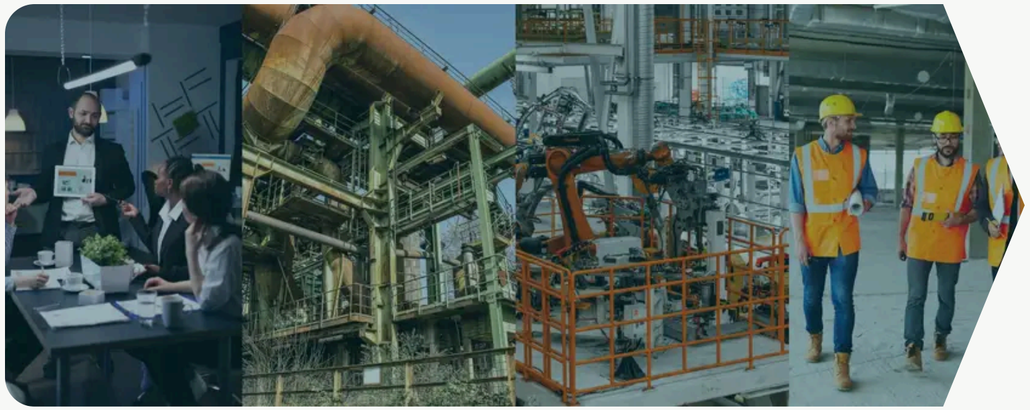

Centralised supply chain management system

CLIENT
Oilfield supplies and services group

LOCATION
Abu Dhabi, operations in 5 countries

CAPABILITY
Lucerra & AI Solutions · Consultancy

SCOPE
Procurement, inventory, logistics

OBJECTIVE

Replace a decentralised model, where each country bought, stocked and shipped on its own, with one supply chain and one view of inventory across the UAE, Saudi Arabia, Oman, Kuwait and Algeria.

SCOPE OF WORK

- Centralised procurement hub with bulk buying of high-turnover items
- Single view of stock and heavy rental assets across distribution centres
- Regional rental pool, so idle equipment is reused before new is bought
- Made-to-order workflow and consolidated shipments

OUTCOME

Procurement standardised across divisions, one live view of inventory and rental assets, and a supply chain built to meet the group's target of a 10% cost reduction within four years.

05

Retail ERP and supply chain transformation

CLIENT
Textile retail group

LOCATION
United Arab Emirates

CAPABILITY
Lucerra & AI Solutions

SCALE
50+ outlets, central warehouses

OBJECTIVE

Bring thousands of fabric SKUs, 50+ outlets, central warehouses and international suppliers onto one system, ahead of peak seasons such as Eid.

SCOPE OF WORK

- Centralised inventory with real-time stock movement control
- SKU structure for fabric type, colour, shade, width and origin
- Demand-driven replenishment and seasonal planning
- Warehouse, transfer, supplier and outlet sales management

OUTCOME

Improved inventory accuracy, faster replenishment, less wastage, better availability in store and stronger control across the business.

06

Multi-hospital management system

CLIENT
Multi-hospital healthcare network

SECTOR
Healthcare

CAPABILITY
Custom software

PLATFORMS
Web and mobile

OBJECTIVE

End medicine stock mismatches, expiry losses and manual purchasing across several hospitals, with one platform for operations and inventory.

SCOPE OF WORK

- Hospital operations, patient management and billing
- Pharmacy and medical inventory with batch and expiry tracking
- Purchase orders, approvals and goods-receipt checks
- Stock transfers between hospitals and real-time dashboards

OUTCOME

One platform across hospitals, departments, pharmacies and laboratories, with live stock visibility, expiry alerts, controlled purchasing and audit trails, built to scale to more sites.

RECENT CONTRACTS

Supply, technical support and people.

Recent and ongoing work for contractors and oilfield companies. Client names are withheld in this edition.

09

Infrastructure power cables

CLIENT
Infrastructure developer
LOCATION
United Arab Emirates
CAPABILITY
EPC & Procurement

Supply of armoured and non-armoured cables for infrastructure works.

- Armoured cables
- Non-armoured cables
- Delivery to site

10

Infrastructure power cables

CLIENT
Energy and construction contractor
LOCATION
United Arab Emirates
CAPABILITY
EPC & Procurement

Supply of armoured and non-armoured cables for infrastructure works.

- Armoured cables
- Non-armoured cables
- Delivery to site

11

Oilfield materials supply

CLIENT
Oilfield services company
LOCATION
Libya
CAPABILITY
Oil & Gas · Procurement

Supply of several materials, from downhole tools to ABBS units, electrical supplies and other items.

- Downhole tools
- ABBS units
- Electrical supplies
- Other materials

12

Technical support and field service engineers

CLIENT
International drilling tools company
LOCATION
Oman and UAE
CAPABILITY
Oil & Gas · Manpower

Ongoing technical support and field service engineers for drilling tool operations.

- Technical support
- Field service engineers
- Service agreement

13

Technical support and lifting engineers

CLIENT
Engineering and construction contractor
LOCATION
United Arab Emirates
CAPABILITY
Manpower · Technical services

Technical support and qualified lifting engineers for construction operations.

- Technical support
- Lifting engineers
- HSE-led lifting operations

MANAGEMENT SYSTEM POLICY · ITS-IMS-POL-01

Our commitment to quality, health, safety and the environment.

IntelTech Solutions and Consultancy is committed to carrying out all activities in a safe, environmentally responsible and quality-driven manner across all areas of operation, and to continually improving its QHSE performance.

Dr. Atheer Alkhazrajy
Managing Director

WE ENSURE THAT ALL OPERATIONS ARE CONDUCTED:

1. In full compliance with legal, regulatory, statutory and contractual obligations, including industry requirements for oil and gas, inspection, engineering, environmental and software work.
2. By trained, competent and authorised people who understand their quality, health, safety and environmental responsibilities.
3. With safe, suitable and well-maintained equipment, tools and technologies.
4. In a way that prevents injury, ill health, property damage and pollution, with safe and healthy conditions for employees, contractors, clients and visitors.
5. With a strong emphasis on pollution prevention, waste reduction and efficient use of energy, water and materials, onshore and offshore.
6. Through consultation and participation of workers, and engagement with clients, suppliers, subcontractors and authorities.
7. By identifying hazards, risks and environmental aspects, and putting effective controls in place.
8. Through continual improvement: monitoring, audits, corrective and preventive action, and management review.

ETHICS AND GOVERNANCE

How we do business.

Our integrated management system is supported by written policies that every employee and partner works to.

Code of conduct and ethics

Honest, fair and respectful conduct with clients, partners and colleagues.

Anti-bribery and corruption

Zero tolerance for bribery, facilitation payments and improper gifts.

Conflict of interest

Declared and managed so decisions are made in the client's interest.

Whistleblower protection

A safe channel to raise concerns without fear of retaliation.

Contract management

Clear obligations, approvals and records from tender to close-out.

Confidentiality and data

Client information protected; information security aligned with ISO/IEC 27001.

Supplier diversity

Fair access for qualified local and diverse suppliers, supporting In-Country Value.

Business continuity

Operations planned to keep running, in line with ISO 22301.

05

Credentials and presence

The registrations, certifications and offices behind our work.

CREDENTIALS REGISTER

Registrations and certifications.
